

Grade Overview for PVC produced in Pernis (Holland)

The grades produced in Pernis are manufactured by a suspension polymerization process.
The number of grades is limited in order to make the consistency of the products as high as possible.

Grade name	K-value ISO 1628-2	Viscosity Index ISO 174	Bulk density (g/ml) ISO 60	Main Applications
S 58-02	58	83	0.570	Fittings, rigid foam
S 60-12	60	88	0.560	(thin-walled) profiles, rigid sheets and films, rigid foam
S 67-04	67	112	0.570	Pipes, window profiles
S 70-16	70.5	125	0.470	Flexible films, profiles, mouldings, cables
